MPT - TOWER PROLYTE

PRODUCT SPECS :

The MPT tower is based on H30V truss and employs a sleeve block that fits to any of the 30 or 40 Series trusses on all four sides by means of bolted CCS6 couplers (either male or female). In combination with an adapter plate, it is also possible to use the sleeve block with either S36R or S36V truss. The MPT tower has a self-weight of 115 kg. The MPT sleeve block is a fully bolted structural element, making it much stronger and more precise than conventional welded versions. The top section and base section can facilitate the use of either a hand winch or a chain hoist. The MPT tower is a cost-effective investment. You need only purchase the special parts if you wish to expand your truss system with towers.

DRY HIRE : NO - Only with Expovision crew
